

NEW ShippyPro Optimizer®

From data darkness to illuminating insights

Struggling to track carrier delays, high delivery costs, failed first delivery attempts, compare promised vs actual delivery times, spot geo-localized customer issues, or verify carrier invoice accuracy?

We understand your frustration in managing fragmented data across multiple carriers and countries, all while trying to make quick and effective decisions.

CHALLENGES

Maintain **visibility** over thousands of international shipments and ensure carriers' performance is under control

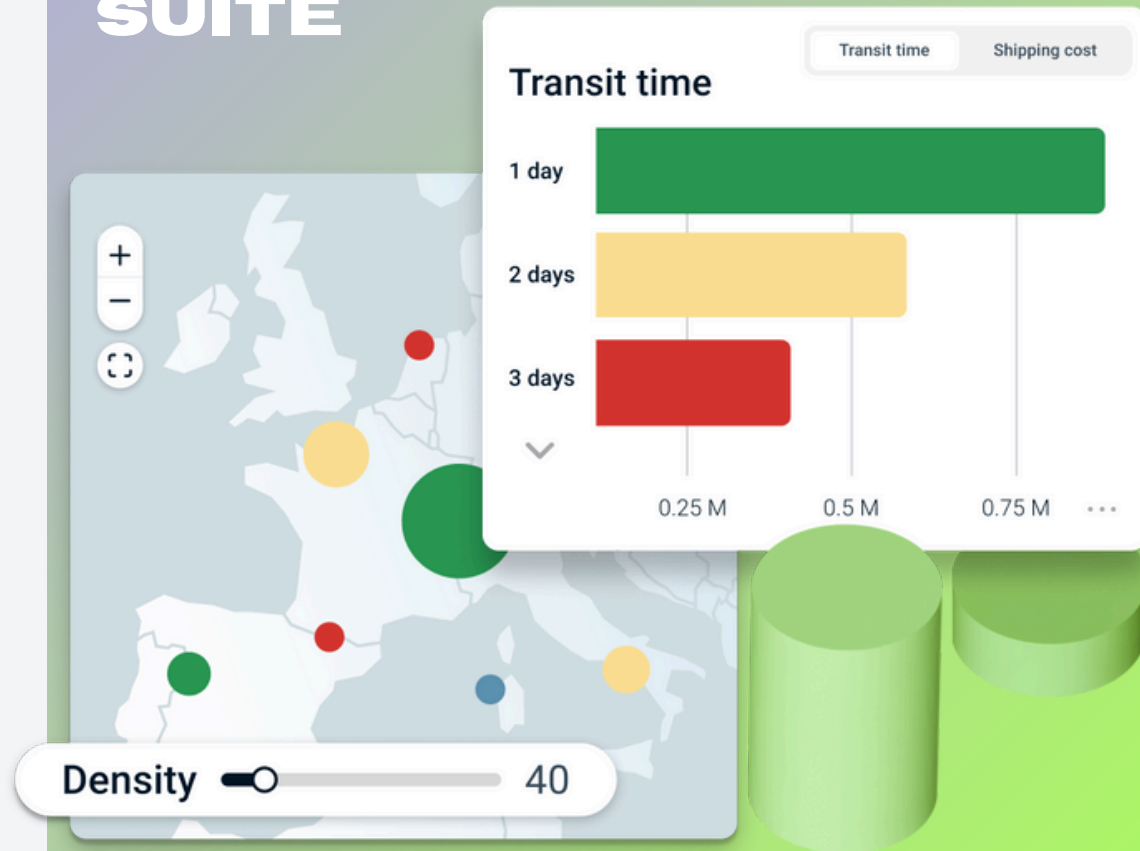

Manual **data retrieval** wastes valuable resources and increases error risks, leading to costly inefficiencies and delays.

Lack of **accessible KPIs** to monitor and improve your delivery experience, ensuring high standard service to your clients

INTRODUCING: SHIPPYPRO INTELLIGENCE SUITE

Streamline operations and elevate your customer experience.

BENEFITS

Real-time in transit visibility

Evaluate the carrier performance with interactive dashboards and filters to assess delivery timeliness against SLAs.

Geo-localized granular insights

Using the interactive map to identify the most expensive countries, regions, or cities with the longest delivery times.

Revenue & cost detailed analysis

In-depth analysis of estimated shipping costs, including breakdowns by carrier or service level for clear visibility and actionable insights.

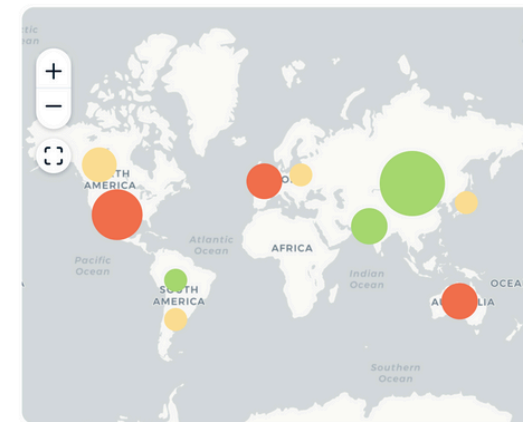

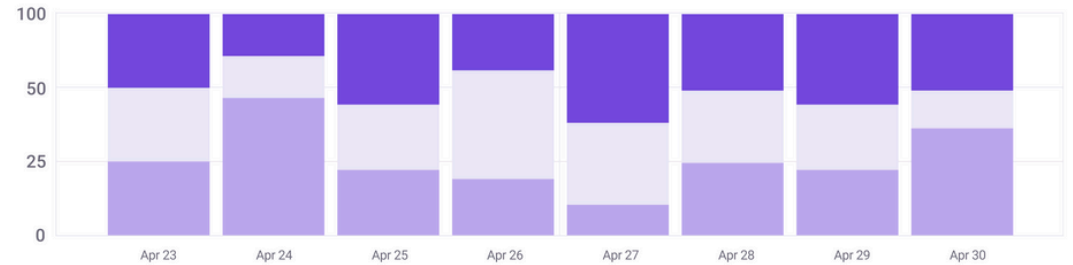

Optimized Customer Experience

Monitor shipments in real-time to swiftly spot delays or lost packages, and pinpoint carriers that have exceptions.

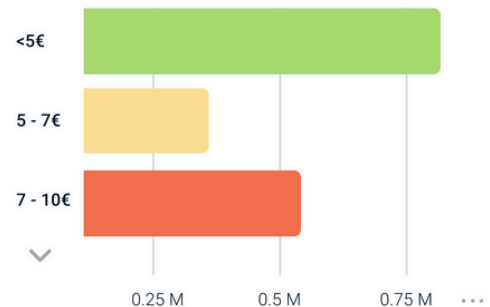

Successful delivery attempts

● 1st attempt ● 2nd attempt ● 3rd+ attempt
